

**SYNOPSIS**

Z-Axis worked with the firm of Ruby & Schofield, who represented the Defendant, Bank of America in this \$457 million dollar trade secrets case.

K.C. Multimedia filed suit against Bank of America alleging conspiracy around several 25 year-old contracts for wireless technology. Bank of America had contracted with K.C. Multimedia to write source code for its customers who wanted to do their banking online as well as wirelessly. Bank of America contended it owned the source code, K.C. contended Bank of America had agreed to license the code and therefore, owed K.C. a considerable sum in licensing fees.

Z-Axis provided strategy consulting to ensure the presentation of expert testimony, video depositions, documents and supporting demonstratives was cohesive and unobtrusive. All exhibits and demonstratives were displayed using Z-Axis' proprietary VuPoint™ Presentation System. A Z-Axis trial technician was in the courtroom during the entire 71/2 week trial to ensure the seamless display of exhibits.

**VERDICT**

The jury deliberated for 2 days and delivered a verdict in favor of Bank of America, on April 26, 2006.
